

DFC 105 CARPET & UPHOLSTERY CLEANER/RINSE

FOR PROFESSIONAL USE ONLY

A detergent free cleaning way of pre-spraying and extraction cleaning carpets and upholstery. Safe on all types of fibre. Safe around chemically sensitive individuals, the elderly and frail. 100% food and drink grade ingredients.

General Usage

- Add 180ml of D.F.C. 105 Liquid Pre-Spray to 4 litres of warm or hot water (20:1).
 - Spray onto carpet or upholstery following your pre-test on each colour of the fabric to be cleaned and pre-vacuuming then brush in using the Chemspec Pile Brush on carpet or the Chemspec Tampico Utility Upholstery Brush and allow to break down the soil for approximately 5 to 10 minutes (do not allow to dry out).
 - Extract rinse out using D.F.C. 105 Carpet & Upholstery Cleaner 30ml to 4 litres (128 to 1) of warm water if possible. If not available, cold water may be used.
 - It is good industry practice to use your Chemspec Pile Brush to reset the pile of the fabric after cleaning the direction of the pile is best agreed with your customer in each particular case.
 - An air-mover or fan will speed up the drying process following all types of extraction cleaning.
- When putting back items of furniture onto wet carpets use the Chemspec Furniture Tabs and Blocks to protect the fabric from rust or furniture stain marks. These are removed when the carpet is dry.
- D.F.C. 105 Liquid is perfume free to avoid any chemical sensitivities and mixing with other perfumes which may be present in the environment.

Hints and Tips

- All DFC products are independently validated, so all our claims on safety for people and the environment are fully backed by independent authorities including Envirosedec, Canada Environmental Choice, Green Seal Certified, Ecoflower and some have the Green Woolsafe standard.
- All the D.F.C. products have full ingredient disclosure on the label.
